(54) **Financial instrument and method of making the same.**

(57) An international financial instrument (10) has a multi-letter international monetary code (12) printed on the face thereof in a first area and an amount (14) printed on the face thereof in a second area. The letters making up the monetary code (12) are printed in a negative pattern and formed by a series of rows of printed dots which define the outlines for the letters. The name of the currency denomination corresponding to the multi-letter international monetary code may be printed in at least one line (40, 42) overlapping the multi-letter international monetary code. Each of the letters may be printed in a negative pattern that includes an open area in which a smaller version of the letter is printed in a positive pattern.
